

TECHTRACS TECH NOTE - CHANGE STACK SIZE (PC) - 2/19/99

A possible solution to memory related problems, such as list screen display errors, is to increase the stack size of 4D Client. The following are instructions for changing the stack size of 4D Client using Customizer Plus.

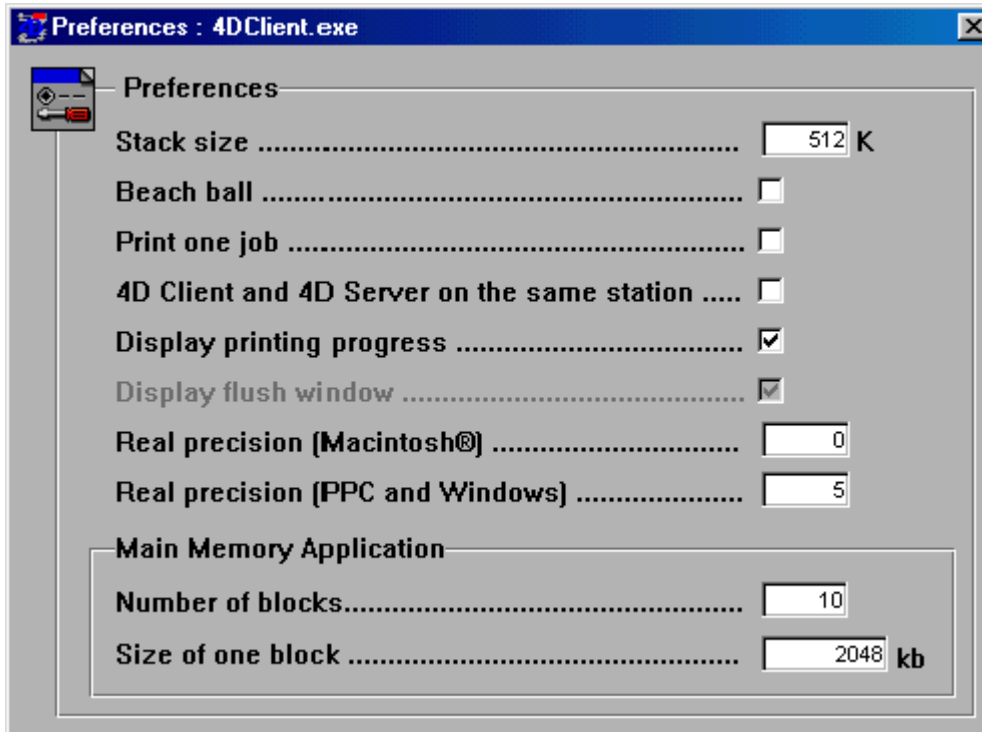

1. From the **Start Menu**, go to Programs/ACI/4D Client/Customizer 6.0.5.
2. Select **Open** from the Customizer Plus **File Menu**.
3. Select the 4Dclient.exe program (C/Aci/Programs/4dcli605) and click **Open**.

4. Double click on the Preferences icon.

5. Change the stack size to 512.

6. Close both windows and click **Save**.
